Best-in-Class Solutions

Proven Success and Results

Science and Evidence Based Practices

How We Do It

Integrated Solutions of:
- **Advising**
- **Assessing**
- **Biological Testing**
- **Technology**
- **Protocols**
- **Training**
- **Operations Systems**

Total Facility Assessment

Our total facility assessment is a critical first step in validating effectiveness in any environmental infection prevention program.

Components:
- Biological Testing - Surfaces and Air
- Hand Hygiene
- PPE Use
- Guidelines Review - CDC, EPA, Corporate
- Chemical Use and Safety
- Cleaning and Disinfecting Tools Review
- Social Distancing and Movement Patterns
- Comprehensive Report

Biological Testing
Do You Know What Is On Your Surfaces?

The Gold Standard for Identifying Pathogens in Your Environment

Be Assured

Validate your cleaning and disinfection efforts, and **Ensure** a safe environment.

Be Informed

Biological testing data becomes a key identifier for **Quality Assurance** and **Process Improvement** plan, also helping to identify key risk areas within your facility.

Be Confident

Biological testing can ensure a safe space after a known COVID case.

CONFIDENCE

A+ Clean and Safe Certification

It is no longer acceptable to have a cleaning and disinfecting program that is just good enough. Customers, employees, and the general public will no longer be satisfied with businesses that put them at risk because they didn't take the appropriate steps to assure a clean and safe environment.

Certification is available as part of our comprehensive program. You will be able to proudly display that you have gone through a certification process and are certified A+ Clean and Safe by Lighthouse.

The program is designed with the goal to ensure your facility has created the safest, risk-free environment possible while adhering to most current regulations and CDC guidelines.

Our Clients

Our clients include more than 500+ hospitals nationwide, professional sports teams, national retail chains, convention centers, schools, universities, and more.

"As we reflect on the 2020 season, we are appreciative to Lighthouse for its professionalism, expertise and unwavering assistance. The Lighthouse staff worked tirelessly to meet our constantly changing requirements and remains a valued partner of the organization. We worked closely with Lighthouse, adjusting to the challenges of Covid19, to modify our cleanliness protocols at Yankee Stadium to best safeguard the well-being of our staff and players."

- Doug Behar, Yankees Senior Vice President and Head of Stadium Operations

We recognize that we are not experts in this new environment of operating in a COVID world. The importance of bringing in experts to help us develop and launch our strategy to ensure clean, safe protocols and guidelines was an easy choice for us. The EIP/Lighthouse program brought proven, successful and practical solutions from the healthcare environment that they effectively applied to our retail environment. We recognized the importance of customer and employee confidence in our commitment to safe and clean spaces and partnered with EIP/Lighthouse to help us not only improve our processes, but to certify that our stores were safe and met regulatory guidelines and recommendations. They certified that we are using best-in-class products and processes and implemented training to meet those standards. The expertise and value they bring to the table is above and beyond our expectations. Together, we are bringing a rigorous regimen of new standards to all Spirit Halloween stores. I think we can all agree, we need Halloween now more than ever!"

- George Sotirin, Executive Vice President Spencer Gifts/Spirit Halloween
