# WELCOME TO
TRACER EIP/IP
by Lighthouse

A comprehensive, user friendly, Environmental Infection Prevention (EIP) & IP platform that displays your operational data, learns your operational patterns, and deploys Artificial Intelligence (AI) to recommend actions for optimal performance.

Key Features

- Dashboards for real-time views of performance
- Cloud-based, Mobile data capture
- Real-time recommendations for most impactful use of resources
- Training and certification
- Employee performance tracking
- Fully integrated with EHR, HCAHPS Vendors, and ancillary environmental services
- Predictive AI to prevent breakout events

Integrated QA, Training, Audits, Inventory, Customer Satisfaction and Infection Control data creating the complete EIP operational resource.

Environmental Infection Prevention

- **Inspections & Audits**
- **Patient Satisfaction (HCAHPS)**
- *TRACER*
- **Resource & Inventory Management**
- **Training**

Benefits

- Predict Infections Before They Occur
- Improved Departmental Efficiency
- Employee Recognition
- Improved Patient Satisfaction
- Reduced HAI's
- Increased Patient Throughput via Reduced Length of Stay and Readmissions

Dashboard Will Help You Achieve

- Better Communication with Healthcare Leadership
- Management of Resources more effectively
- Quick Response Action Plans
- Complete Picture of the Impact EIP/ES Services are having on Clinical Infection Prevention (HAI) Rates

- Consistent Training & Certification on Equipment, Policies, Practice and Guidelines
- Improved HCAHPS Scores
- Visualization of budgetary expenditures
- Improved Environmental & Clinical Team Performance
