

# Comprehensive Facility Assessment & Report

**The Comprehensive Facility Assessment** is a multimodal audit of your entire environment. Based on your specific needs, audits can be completed for Environmental Services, Food Services, Patient Transport, Facilities Management, Laundry & Linen and Waste Management. Following the assessment, you will be provided with a detailed report containing data on all key assessment findings, suggestions and recommendations, and an action plan.

## Options for the audits include the following areas:

- HCAHPS & Patient Satisfaction
- Environmental Infection Prevention & Safety
- Staffing & Productivity
- Operations:
  - Program standards
  - Quality Assurance
  - Pattern of Management
  - Technology & Software

- Regulatory Compliance
- Training & Development
  - Management
  - Hourly staff
  - Product & Equipment Review

- Biological Testing of Surfaces & Air (all data is confidential)
  - Total Aerobic Colony Forming Units (CFU's)
  - Fungal CFU's
  - MRSA CFU's
- Indoor Air Quality monitoring

**Our report** is designed to be a tool to help you best utilize your limited resources, detailing assessment observations, gap analysis, biological test results and a corrective action plan. Included in the report:

- Comprehensive Plan Outline
- Immediate action items
